

# CROWN *Cornice*

MOULDINGS & MILLWORKS INC.

**DRAMATIC DETAILS &  
AFFORDABILITY ARE THE  
DIFFERENCE**

*CrownCornice* is a Canadian owned and operated company specializing in the manufacturing, distribution and installation of Industrial Grade (high density) fibre board mouldings and trims.

Our extensive product line incorporates the timeless elegance of plaster with the modern functionality and cost effectiveness of high density fibre board. We carry a wide variety of mouldings which complement any decor from traditional to contemporary which turns any room into an architectural masterpiece. Our traditional series offers a wide variety of elegant profiles for a clean modern look.

The quality and craftsmanship of our Industrial Grade Fiberboard, coupled with our superior installation, service and warranty is what separates CrownCornice from the low grade/density materials offered at the big box stores and other competitors.

We recommend a 5-6 inch crown for a standard 8 ft ceiling and a 7-8 inch for a 9ft. Our entire selection of crown mouldings, from 5 to 8 inches, are in one solid piece. In addition, for higher ceiling applications, an extension can be added to all our crowns to achieve a profile from 9 to 12 inches.

*CrownCornice* looks forward to helping you achieve your highest expectations!

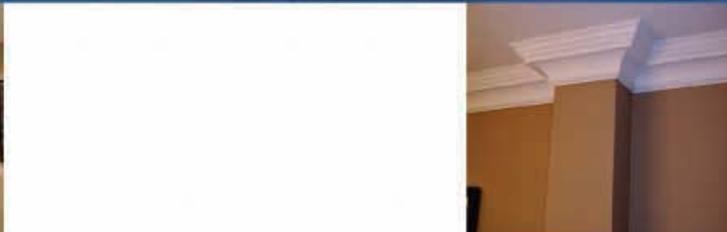

# CROWN *Cornice*

MOULDINGS & MILLWORKS INC.

CrownCornice is committed to quality, and we stand behind our installation.

We are  
**#1 in Customer Service.**
